

## The Current Situation of the Social Nursing and the Future Way

TOKUOKA Hiromi

The social nursing in Japan started for the purpose of protection, the accommodation of a war orphan and the juvenile vagrant for the postwar confusion period. And it was facilities nursing to have continued supporting social nursing while being affected by Showa, Heisei and the times. However, there was the form without being able to greatly step forward from facilities of the postwar protection, accommodation.

Meanwhile, a lot of proposal has been done by the viewpoint that how was it that was the “measures for the security of the quality of the reinforcement and care of the right protection of the child” “to wrestle for the improvement of the quality of social nursing such as the expansion of the homey nursing” “expansion policy of the social nursing system”.

In such a flow, a revision of the Child Welfare Law was made in 2016 and a child was the main constituent of the right and gave priority to home nurture and made that I promoted special adoption and the nurture by the foster parent clear when substitute nurture was necessary.

“A new social nurture vision” was proposed to embody this idea. Here, I review social nursing mainly on the past facilities nursing totally and show directionality of a problem and the reform before support in being at home leading to substitute nurture.

I want to lecture while overlooking the current situation of the social nursing in this article, and inspecting “a new social nurture vision” how there should be the way of the future social nursing.
